<ib>Journal</ftrl>
<cb>This publication was produced at an average cost of 2.7 cents per single
page in compliance with the Constitution and for the purpose of informing
members of the Legislature and the public of actions of the House of
Representatives.</cb>
<p>The House was called to order by the Speaker at 8:30<nbs>a.m.
<hdl>Prayer</hdl>
<p>The following prayer was offered by the Reverend Bruce E. Turner of West Gate Baptist Church of
<p>Dear God, it is with a deep sense of reverence and awe that we come before you today, this open
<p>We acknowledge your sovereignty as our creator. We not only acknowledge your sovereignty, but
Representative be sensitive to the need for divine direction as they enter into the deliberations
constituents around this great state. Give them an understanding of their high calling and may th
reward good.
<p>Lord, we would ask a special measure of strength be given to each of these Chosen Representativ
make correct decisions; courage, if necessary, to stand alone in the pursuit of that which is right.
Help them to be sensitive to the needs of every man and woman
uprightness.
<p>We pray that every decision will result in making our stat-
our state as the place to live in the sunset of their lives.
<p>We ask you now, dear Lord, to give each of these, your ser-
to do their job and still have time and energy to maintain th
before them.
<p>Now, God, we ask you to bless each member of this House, in
dear state and God bless the United States of America. Amen

Over-Site Composition Engine

The Over-Site Composition Engine combines the ability to perform automatic composition and pagination with the ability to produce high quality results. The Engine is a general purpose tool which can produce complete pages, including merged illustrations, in any typographic format, from input files that are convenient to the user. It also offers an optional SGML Composer to handle technical manuals and the like.

Some example applications include directories, catalogs, technical manuals or books of any kind.

Composition Engine Capabilities

No two client requirements are alike, but our Composition Engine can handle it with ease. Once you define the composition requirements for any data file, a style & format file are created to produce the desired typographical result the first time and *every* time thereafter, regardless how much the content varies. Our Composition Engine is extremely powerful and includes many, many sophisticated instructions to see to it that all of your composition requirements are fulfilled.

We offer two versions of our engine—Basic for line data reports and Pager for more complex solutions.

In order to demonstrate just how powerful it really is, just take a look at just a few of the capabilities listed below.

Features

Line Composition

- Fielded data can be composed flushed left, centered, or flushed right
- Running text can be composed justified, flushed left, centered or flushed right
- Hyphenation by dictionary and logical routines
- Discretionary hyphen
- Discretionary break without hyphen
- No-break word space
- No-break hyphen
- No-break text strings
- User specified natural-break characters within words
- User specified minimum, nominal and maximum word spaces
- Automatic ligature generation

- Selective kerning
- Leadering with one or two specified characters
- Underscore, over-score or strike-through text
- Unlimited number of fonts
- Trial fitting and erasing of any character string
- Automatic detection of embedded composition controls
- Automatic color separation for textual item.

Area Composition

- Automatic elimination of widows and orphans
- Trial fitting and erasing back to any position within a block
- Interline leading may be changed at any time
- Vertical & horizontal rules of any length and thickness may be generated
- Illustrations may be merged with composed text

Page Composition

- Running heads and footers may be composed anywhere on the page
- Automatic page incrementing
- Footnotes including multi-column and carryover footnotes may be composed
- Trial setting and erasing all the way back to beginning of previous page
- Automatic column balancing for both tabular & textual content
- Merging of data and forms
- Creation of pie, line & bar charts from variable data on the page

Document Composition

- Trial setting and erasing of entire job
- Composed pages can be reprocessed to insert composed textual matter derived from the initial composition pass

And that's not all. To find out all the features and capability of our Composition Engine, just contact us for a live demonstration or ask us to tell you more.
